

MABARA LAUNCHES

NEXT GENERATION CONTROL PANEL

MODEL : MXP - LIFT

Key Features:

- Powered by 16 bit Microcontroller allows to integrate complex functionality.
- Complete 2 wire CAN and RS485 interfaces between controller and field, reduces wiring complexity.
- Neutral free design makes the system more reliable.
- Wall mounted compact panel makes it more suitable for machine room less(MRL) applications.
- Integrated ARD fits the panel more appropriate for Indian elevators.
- Surface Mount Devices (SMD) allows us to develop cute and compact control boards and Displays.
- PC interface and remote data monitoring supported.
- Supports duplex, triplex and quadraplex up to 32 floors.
- Possible to configure Multi car speed based on number of floors to be traveled.
- Panel suitable for VVVF and PM motor drives.
- All input and outputs are well protected from over load and short circuit.
